## Problem:

Currently, there is no way for UW community members to know how long they will have to wait to buy food on campus without visiting the actual locations.
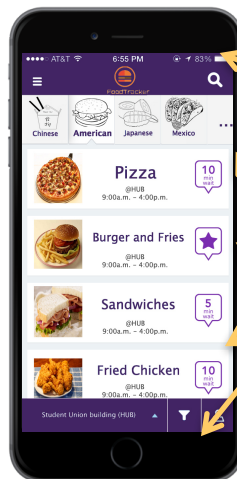

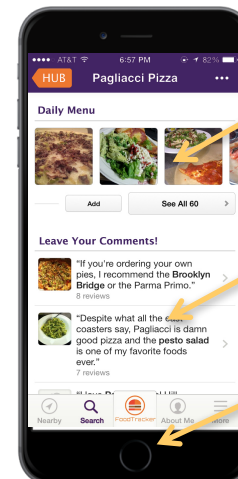

Solution:

Food-Tracker, An App designed for iOS and Android mobile devices that provides users with estimate waiting times and accurate information on menu and daily specials for campus dinning locations.

- On-campus dinning search
- Estimate Wait time for that dining hall
- Dinning direction

- Food search
- Estimate Wait time for that vendor

- Pictures for Daily Specials
- Comments, Live feeds
- Application customization (languages, voice over, theme changing)

Values:

- 😊 Time Management: huskies get restaurant according to their schedule
- 😊 Civility: regulated live feed!
- 😊 Accuracy: live feed on daily offers/specials

Diversity Supports:

- 😊 Customizable language will enhance user's sense of belonging to UW and lessen the culture shock
- 😊 Theme changing option will take care of the aesthetic of different individual.
